Summer Beach Testing Results June 2022

On June 14, 2022, water samples from association and public beaches in Salem were collected and submitted for microbiological analysis to the New Hampshire Department of Environmental Services Laboratory in Concord.

The samples were analyzed for bacteria, (E. coli), the indicator organism utilized to determine safe swimming conditions. At a freshwater beach, an **advisory** is posted if either **two** samples exceed the state standard of **88 counts** or when **one** sample exceeds **158 counts**.

Two samples were collected from each beach in accordance with the NH DES "Standard Operating Procedure for Bacteria Sampling". The following beach sites were sampled and the results are as follows:

Location:

E. coli Results:

June 14

Hedgehog Pond -----	1, 6
Shadow Lake -----	11, 12
Captain's Pond	
Camp Otter -----	79, 105
Camp Hadar -----	72, 12
Camp Y-Wood -----	30, 19
Millville Lake -----	15, 17
Arlington Pond	
Arlington Pond Improvement Assoc. -----	4, 28
Second Street Beach -----	15, 11

All of the beaches are in compliance with the guidelines established by the NH DES for safe swimmable waters at this time.

Additional testing will be conducted in early July. Any questions, please feel free to contact the Health Officer at 890-2050.
