Summer Beach Testing Results June 2024

On June 10 & 11, 2024, water samples from association and public beaches in Salem were collected and submitted for microbiological analysis to a NH accredited laboratory.

The samples were analyzed for bacteria, (E. coli), the indicator organism utilized to determine safe swimming conditions. At a freshwater beach, an **advisory** is posted if either **two** samples exceed the state standard of **88 counts** or when **one** sample exceeds **158 counts**.

Two samples were collected from each beach in accordance with the NH DES "Standard Operating Procedure for Bacteria Sampling". The following beach sites were sampled and the results are as follows:

| <u>Location:</u> | <u>Results:</u> | |
|---|-----------------|----------------|
| | <u>June 10</u> | <u>June 11</u> |
| Hedgehog Pond ----- | 19, 45 | |
| Shadow Lake ----- | | 6, 12 |
| Captain's Pond | | |
| Camp Otter ----- | 16, 26 | |
| Camp Hadar ----- | 14, 10 | |
| Camp Y-Wood ----- | 11, 14 | |
| Millville Lake ----- | 14, 28 | |
| Arlington Pond | | |
| Arlington Pond Improvement Assoc. ----- | 7, 11 | |
| Second Street Beach ----- | 16, 11 | |
| Griffin Beach ----- | 15, 12 | |

All of the beaches are in compliance with the guidelines established by the NH DES for safe swimmable waters at this time.

Additional testing will be conducted in early July. Any questions, please feel free to contact the Health Officer at 890-2050.
