**Summer Beach Testing Results
July 2022**

On July 13, 2022, water samples from association and public beaches in Salem were collected and submitted for microbiological analysis to the New Hampshire Department of Environmental Services Laboratory in Concord.

The samples were analyzed for bacteria, (E. coli), the indicator organism utilized to determine safe swimming conditions. At a freshwater beach, an **advisory** is posted if either **two** samples exceed the state standard of **88 counts** or when **one** sample exceeds **158 counts**.

Two samples were collected from each beach (except for Griffin Beach) in accordance with the NH DES "Standard Operating Procedure for Bacteria Sampling". The following beach sites were sampled and the results are as follows:

Location:

E. coli Results:

July 13

Hedgehog Pond -----	3, 2
Shadow Lake -----	6, 17
Captain's Pond	
Camp Otter -----	1120, 1203
Camp Hadar -----	70, 41
Camp Y-Wood -----	4, 5
Millville Lake -----	4, 9
Arlington Pond	
Arlington Pond Improvement Assoc. -----	1, 1
Second Street Beach -----	22, 79
Griffin Beach -----	5

A No Swimming Advisory is currently in place for Camp Otter at Captains Pond.

All of the other beaches are in compliance with the guidelines established by the NH DES for safe swimmable waters at this time.

Additional testing will be conducted in early August. Any questions, please feel free to contact the Health Officer at 890-2050.
